

What's in the box?

ArcGIS for Desktop includes:

ArcGIS Online Subscription

100 Credits per desktop

Service credits are consumed when you use certain services in Esri's cloud, such as geocoding, hosted feature or tile services, or spatial analysis.

ArcGIS Maps for Office

Microsoft Excel and PowerPoint users can use the power of maps to ask location related questions of their data. Get new insights to make smarter decisions.

One Named User per desktop

Each user has an unique, individual user name and password to access organisational apps and content

Operations Dashboard

Get a real time view and common operating picture. Add data feeds to events or daily operations. Integrate maps, charts, gauges and histograms.

Workforce for ArcGIS

Maximizing the efficiency of your field workforce is key to a successful mobile strategy and with the introduction of Workforce for ArcGIS now you can plan, monitor and streamline field to office workflows using the ArcGIS platform.

Collector for ArcGIS

Efficient, accurate, data collection on smartphones or tablets replaces paper forms. Respond, record, work on- or offline and sync automatically

Web App Builder

Create HTML/JavaScript app with ready to use widgets that run on any device. Customise the look with configurable themes. No coding required

Configurable Web Apps

Choose from a comprehensive set of templates to quickly configure focused apps

Survey123 for ArcGIS

Use a form based survey interface in a lightweight, intuitive app. In just a few clicks you can collect, manage and analyse survey results

ArcGIS Online Basemaps

ArcGIS includes a suite of basemaps that provide reference maps for our world and context for your work. These maps are built from the best available data from a community of authoritative data providers and presented in multiple cartographic styles. The maps are designed to emphasize different views of our world, from physical to political

One ArcGIS for Windows Mobile per desktop

ArcGIS for Windows Mobile extends GIS beyond the office and provides an accurate, reliable, common operating picture for field staff.

ArcGIS Pro

The latest edition to ArcGIS for Desktop. Create 2D and 3D maps. Edit and analyse data faster than ever using a new high performance 64-bit architecture.
