

Exploring Enterprise GIS: A Workshop for Leaders

Duration: 1 Days (4 Hours)

Discover the full potential of your ArcGIS platform.

Get the key information you need to understand how your organization can deploy an enterprise GIS on the ArcGIS platform to full advantage. The instructor will discuss common business patterns that drive GIS adoption and the ArcGIS platform capabilities that yield strategic insights and better decision making. Examples of how organizations achieve value through enterprise utilization of ArcGIS tools, content, and workflows are presented.

Goals

Identify common GIS patterns of use that apply to your organization.

Identify specific ways your organization could benefit from insights produced by spatial analysis.

Evaluate the use cases for deploying ArcGIS platform components.

Identify opportunities to use ArcGIS in new ways.

Who should attend?

GIS Manager

GIS Specialist

GIS Professional

Suggestion

Completion of **ArcGIS 2: Essential Workflows** or equivalent knowledge.

e-Learning related course: Advanced Techniques for Cartographic Representations

Software
