

A A R S E

African Association of Remote Sensing of the Environment
Association Africaine de Télédétection de l'Environnement

Founded in 1992 and incorporated in 2008 as an international Non-Government Organization (NGO) under Section 21 of the South African Companies Act 61 of 1973.

Our Mission and Objectives

- Our commitment to advancing Earth Observation and Geo-information Technology through our mission-driven objectives, aimed at fostering sustainable development and technological innovation across Africa and beyond.

The Association's

Mission is to:

- Empower members to make a positive impact on Africa and the world through Earth Observation and Geoinformation Technology.
- Drive innovation in the field of Earth Observation and Geoinformation Technology by fostering collaboration and knowledge sharing among members.
- Build a strong community of like-minded professionals who are passionate about Earth Observation and Geoinformation Technology.
- Foster collaboration among members, industry partners, and other stakeholders to achieve common goals.
- Make a tangible impact on society and the environment through the application of scientific knowledge and technology.
- Lead the way in advancing the field and setting standards for excellence.
- Provide educational resources and opportunities for members to enhance their skills and knowledge.
- Advocate for policies and initiatives that support the use of Earth Observation and Geoinformation Technology for the greater good.
- Connect with professionals from around the world to address global challenges and opportunities.

Africa GIS and UNGGIM Africa Conference, Accra, 17-21
November 2025

Membership

- <https://africanremotesensing.org/membership/>
- As a member of AARSE, you'll enjoy exclusive access to competitions, conferences, job vacancies, and workshops tailored to enhance your skills and knowledge in Earth Observation and Geo-information Technology. Additionally, you'll have the opportunity to network with industry experts and contribute to sustainable development initiatives across Africa.

Next Major Event: AARSE 2026

- AARSE 2026 Conference | University of Zimbabwe, Harare, Zimbabwe / 30th anniversary of AARSE, last week of October 2026

- ***Smart Earth, Smart Africa, Harnessing Space Technologies for a Resilient and Sustainable Future***

- **Please be on the look out: The call for abstract and other information will soon be out**
